Two-piece traffic cone (TL)

Item number : 307.610750.00.02

Details

In order to remain flexible in the way you use your traffic cones, the upper part of the cone and the cone base are made of two different materials. The upper part is moulded from HD-PE, the replaceable base is made of recycled material. Both are firmly joined together. The innovative anti-tipper edge in the cone base ensures high stability. The recessed grip simplifies handling and stacking is possible without annoying suction. The WEMAS TL-traffic cones in two parts are BASt-tested and approved according to TL-traffic cone 94 and DIN EN 13422 and do not contain any hazardous substances according to REACH. An individual marking is possible with your logo as film imprint or profiling in the cone base.

Highlights

- high stability
- good stackability
- handy recessed grip
- REACH compliant and temperature resistant

Specifications
