

# Reflex safety barrier (TL)

Item number : 305.460732.20.01

## Highlights

- ✓ barrier with longitudinal reflection function for tradesmen with the highest demands regarding safety and product quality

## Details

WEMAS literally sets signals in the market with a world first: the patented, wave-shaped surface profile complements the proven retroreflective film and thus reflects the headlight light much more clearly even at flat radiation angles. The new surface profile connects with the robust and extremely resistant quality of the WEMAS product generation "Future". This includes the blown on lamp sockets, the UV-stabilised HD-PE and the centrally mounted carrying handle, which ensures ergonomic comfort. The WEMAS TL-safety barrier Reflex is tested and approved according to TL-barriers 97 and the ZTV-SA.

## Specifications

<b>Customizable</b>	Yes
<b>bracket</b>	Plastic
<b>pipe</b>	42x700mm
<b>colour</b>	Traffic white
<b>foil type</b>	RA1
<b>foil colour</b>	red/white
<b>foil width</b>	2.000 mm
<b>foil sides</b>	one-sided
<b>material</b>	HDPE
<b>Weight</b>	17,00 kg
